SUMMARY

Computer Science and Engineering undergraduate (B.Tech, 2027) with hands-on experience in machine learning and front-end development. Builds with Python, ML, and React.js, and focuses on Generative AI and data analysis. Seeking a Gen AI / ML / data role to apply and grow these skills on real-world projects.

EXPERIENCE

Data Science Intern | CodeAlpha

2026 (6 weeks)

- Built a sales prediction model using Python
- Performed unemployment data analysis using Python
- Developed an iris flower classification model using Python

Code: [GitHub](#)

Machine Learning Engineer Intern | Internpe

Jun 2025 - Jul 2025

- Developed a car price prediction model that estimates a vehicle's price from its features
- Cleaned and preprocessed data to prepare it for modeling
- Evaluated model performance and iterated to improve results

Web Developer Intern | Codeon Technologies Private Limited

May 2023 - Nov 2023

- Developed the front end of web projects using HTML, CSS, JavaScript, and React.js

PROJECTS

Hostel Management System | PHP 8, MySQL, Bootstrap 5, JavaScript

- Built a full-stack hostel management portal in core PHP and MySQL (PDO) with a ~40-table database, covering rooms, allocations, attendance, fees, leaves, visitors, and complaints
- Implemented role-based access for Admin, Warden, and Student; wardens for the boys' and girls' hostels share one login page, and each sees only their own hostel's data and profile
- Wardens take attendance, log visitors, and approve leave requests; students self-register and view their fee status (paid or unpaid), roommates, and roommates' branches
- Admin has final authority over all modules, including approving vacate requests and verifying fee payments, with printable fee receipts
- Secured with bcrypt password hashing, prepared statements, CSRF tokens, and login-attempt throttling
- Also developed an Android app version of the system using Flutter, with Supabase for cloud storage

Live demo: [collegehostel.ifree.page](#) | Source code: [Web app \(PHP\)](#) | [Android app \(Flutter\)](#)

Telugu AI Animated Video Pipeline | Personal project

- Built a reusable pipeline and prompt engine for producing Telugu-language AI-generated animated videos

EDUCATION

B.Tech, Computer Science and Engineering | YSR Engineering College, Proddatur

2023 - 2027

CGPA: 7.5 (80%)

Diploma in Computer Science and Engineering | Sri Venkateshwara Polytechnic College

2021 - 2023

CGPA: 8.0 (81%)

SKILLS

Languages: Python, PHP, C, JavaScript

Web: HTML, CSS, Bootstrap, React.js

Mobile: Flutter

Databases: MySQL, Supabase

Focus areas: Machine Learning, Generative AI, Data Analysis

ACHIEVEMENTS

- Participated in a 12-hour hackathon at RGUKT IIIT (participation certificate)
- Attended a National-level workshop on Quantum Insights
- Attended a National-level workshop on AI/ML
